

Question 1

Changes to a system are usually implemented in batches.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=433866>

Question 2

What is outsourcing? Identify two outsourcing arrangements. Identify two reasons for outsourcing.

Answer: <https://biology-forums.com/index.php?topic=432606>

Question 3

What would be the estimated time for completion if the time estimates for report design are as follows: optimistic = 3 weeks; pessimistic = 9 weeks; realistic = 6 weeks?

- A) 6 weeks
- B) 5 weeks
- C) 18 weeks
- D) 3 weeks

Answer: <https://biology-forums.com/index.php?topic=432838>

Question 4

In UML, an initial state is shown as a small, solid, filled circle.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=433359>

Question 5

In a typical client/server architecture, all database recovery, security, and access management is localized at the client.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=432540>

Question 6

On the Internet, form interaction is the standard method of gathering and displaying information when consumers order products, request product information, or query account status.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=432909>

Question 7

XML is the most basic way to implement a standard style design within a Website.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=432626>

Question 8

Questions in interviews asking those responding to choose from among a set of specified responses are:

- A) closed-ended questions
- B) structured questions
- C) specific questions
- D) open-ended questions

Answer: <https://biology-forums.com/index.php?topic=432497>

Question 9

Logic modeling deliverables include _____, _____, _____, _____, _____, and _____.

Answer: <https://biology-forums.com/index.php?topic=433745>

Question 10

Highlighting should be used as often as possible to draw the user away from or to certain information.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=432959>

Question 11

A method that helps you to better understand how a system fits within existing business activities and data best defines:

- A) integration depth
- B) context development
- C) system granularity
- D) organizational breadth

Answer: <https://biology-forums.com/index.php?topic=432915>

Question 12

CASE tools designed to support the information planning and the project identification and selection, project initiation and planning, analysis, and design phases of the systems development life cycle are called:

- A) integrated CASE
- B) cross life cycle CASE
- C) lower CASE
- D) upper CASE

Answer: <https://biology-forums.com/index.php?topic=432839>

Question 13

As a Website designer, how can you avoid errors caused by hidden links?

Answer: <https://biology-forums.com/index.php?topic=434006>

Question 14

The rate of return used to compute the present value of future cash flows refers to:

- A) discount rate
- B) future cash flow rate
- C) investment rate
- D) transfer rate

Answer: <https://biology-forums.com/index.php?topic=432169>

Question 15

One key to designing quality business processes is the delivery of the right information to the right people, in the right format, at the right time.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=433134>

Question 16

Ginzberg found that successfully managing user expectations is related to successful systems:

- A) project identification and selection
- B) project planning and initiation
- C) design
- D) implementation

Answer: <https://biology-forums.com/index.php?topic=432266>

Question 17

Which of the following is an area addressed by a design specification document?

- A) feasibility
- B) nonfunctional requirements
- C) project scope
- D) management issues

Answer: <https://biology-forums.com/index.php?topic=432104>

Question 18

_____ are the part of a decision table that lists the conditions relevant to the decision.

Answer: <https://biology-forums.com/index.php?topic=433773>

Question 19

When designing Web pages, which of the following is the recommendation for avoiding anything that looks like advertising?

- A) avoid using large images, lots of images, unnecessary animations, or other time-consuming content
- B) avoid scrolling text and animations since they are both hard to read and users often equate such content as advertising
- C) make sure that users do not need the latest browsers or plug-ins to view your site
- D) make sure you avoid designing any legitimate information in a manner that resembles advertising

Answer: <https://biology-forums.com/index.php?topic=433370>

Question 20

A _____ represents the common behavior among specialized use cases.

Answer: <https://biology-forums.com/index.php?topic=433672>
