Question 2

The authors take the following stand towards the practice of researchers to reveal their research subjects' "misrecognitions."

- A. This is a humiliating practice that violates research ethics.
- B. This is an important contribution that researchers can make to our understanding of the politics of a situation.
- C. This rarely takes place because most qualitative researchers see their goal as one of fairly representing the views of research subjects.
- D. This is a situation that can be avoided by interviewing research subjects about their feelings and opinions rather than their factual knowledge.
- E. This practice reflects a research fallacy because it is based on the erroneous position that there is an absolute truth which can be either recognized or misrecognized.

Question 7

Using a beta coefficient corrects what problem in multiple regression?

- a) different units of measurement
- b) multicollinearity

- c) a dichotomy
- d) inaccurate measurement

Answer: <https://biology-forums.com/index.php?topic=260201>

Question 8

Which of the following is NOT an element of grounded theory?

- A. A comparative analysis
- B. Creation of a textual data base.
- C. Open coding and identification of categories.
- D. Reification of the underlying concepts.
- E. Axial coding to identify relationships among categories.

Answer: <https://biology-forums.com/index.php?topic=259754>

Question 9

Which of these is NOT an advantage of focus groups?

- a) They may be more "realistic" than interviews of individuals.
- b) They are highly structured.
- c) They may produce more accurate insights into the thoughts of participants.
- d) Group dynamics may be observed.

Answer: <https://biology-forums.com/index.php?topic=260212>

Question 10

What is secondary analysis?

- a) a follow-up survey
- b) a survey pretest followed by an actual survey
- c) surveying two different populations
- d) use of a previous survey for new analysis

Answer: <https://biology-forums.com/index.php?topic=260103>

Question 11

Which of the following results from elite interviewing?

- a) qualitative data
- b) quantitative data
- c) standardized data
- d) extensive tabular data

Answer: <https://biology-forums.com/index.php?topic=260231>

Question 12

All ethnographers have in common:

- A. the experience of entering a field
- B. conducting interviews
- C. video recording observations
- D. observing a culture
- E. all of the above
- F. (a) and (d) only

Answer: <https://biology-forums.com/index.php?topic=259842>

Question 13

The major goals of field notes are:

- A. disciplining data gathering
- B. making public the basis of your interpretation
- C. observing and interacting with informants who are "local heroes"
- D. filling up otherwise empty time in the field
- E. (a) and (b) only
- F. none of the above

Answer: <https://biology-forums.com/index.php?topic=259885>

Question 14
