Answer: <https://biology-forums.com/index.php?topic=542667>

Question 11

In a study of children's memory strategy, a test was administered where the children had to recall a 20-item list of words consisting of five categories of words. Follow-up tests were done at 6 months and 12 months after the initial assessment. The researchers found that children's use of the organization strategy

- a. improved gradually over the 12 month period, leading to gradual improvements in their memory recall.
- b. reached a peak after just a few trials at the initial test period.
- c. occurred only after training was finally given at the 12-month test period.
- d. sometimes occurred suddenly (for example at the 6-month test period), leading to a sudden jump in memory recall.

Answer: <https://biology-forums.com/index.php?topic=541880>

Question 12

Describe the characteristics of telegraphic speech and how infants use it to communicate.

Answer: <https://biology-forums.com/index.php?topic=540814>

Question 13
