

Question 1

When using the normalized relation notation, the primary key attribute is indicated by a dashed underline.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=723057>

Question 2

A cost associated with project start-up refers to a(n):

- A) infrequent cost.
- B) incremental cost.
- C) recurring cost.
- D) one-time cost.
- E) consumable cost.

Answer: <https://biology-forums.com/index.php?topic=723232>

Question 3

Which of the following is NOT associated with logical and physical database design?

- A) Structure the data in stable structures that are not likely to change over time and that have minimal redundancy.
- B) Develop a logical database design from which we can do physical database design.
- C) Develop a logical database design that reflects the actual data requirements that exist in the forms and reports of an information system.
- D) The preparation of a final conceptual model and the implementation of the database.
- E) Translate a relational database model into a technical file and database design.

Question 4

Each entity type in an ER Diagram becomes an attribute.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=723101>

Question 5

When executing the baseline project plan, the project manager will initiate the execution of project activities, acquire and assign resources, orient and train new team members, keep the project on schedule, and assure the quality of project deliverables.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=722943>

Question 6

When comparing observations and document analysis, the expense of observations is rated moderate.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=723336>

Question 7

Which of the following is NOT a function of decomposition?

- A) Allow attention to be concentrated on the part of the system pertinent to a particular audience, without confusing people with details irrelevant to their interests
- B) Build different parts of the system at independent times and have the help of different analysts
- C) Permit different parts of the system to be built at the same time by the same person
- D) Break a system into smaller, more manageable and understandable subsystems
- E) Facilitate the focusing of attention on one area (subsystem) at a time without interference from other parts

Answer: <https://biology-forums.com/index.php?topic=722619>

Question 8

The organizational process of changing over from the current information system to a new one best defines:

- A) physical design.
- B) reorganization.
- C) system alteration.

- D) replacement.
- E) installation.

Answer: <https://biology-forums.com/index.php?topic=723403>

Question 9

In UML, an object is represented by a rectangle with two compartments.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=723503>

Question 10

Indexes should be used generously for databases that support transaction processing and other applications with heavy updating requirements.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=723145>

Question 11

An information system interacts with its environment by:

- A) receiving data.
- B) processing data.
- C) XML protocols.
- D) sending data.
- E) systems analysts.

Answer: <https://biology-forums.com/index.php?topic=722583>

Question 12

Ensuring that all contractual terms of the project have been met is done during:

- A) communicating the project status.
- B) setting a baseline project plan.
- C) closing the customer contract.
- D) project implementation.
- E) conducting postproject reviews.

Answer: <https://biology-forums.com/index.php?topic=723034>

Question 13

Identify four types of installation.

Answer: <https://biology-forums.com/index.php?topic=723457>

Question 14

A JAD is an inexpensive, popular requirements determination technique.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=723345>

Question 15

Structure charts, logic models, and data models are the major deliverables associated with the object-oriented modeling approach.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=723459>

Question 16

This type of user documentation allows users to test for proper system installation and then signify their acceptance of the new system and its documentation with their signatures.

- A) Request for Proposal (RFP)
- B) Acceptance sign-off
- C) System verification
- D) User contract
- E) Statement of Work

Answer: <https://biology-forums.com/index.php?topic=723425>

Question 17

Two different names used for the same attribute is called a synonym.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=723122>

Question 18

Which of the following is a reason for directly observing end users?

- A) People often do not have a completely accurate appreciation of what they do or how they do it.
- B) Observations are not very time consuming.
- C) Employees will alter their performance if they know that they are being observed.
- D) Interviewing is less rich, passive, and often provides ambiguous data.
- E) The analyst gets a snapshot image of the person or task being observed.

Answer: <https://biology-forums.com/index.php?topic=723426>

Question 19

Generally speaking, highlighting methods appear the same on all output devices.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=722858>

Question 20

When referencing an employee entity, an employee's skills are an example of a multivalued attribute.

- A) True
- B) False

Answer: <https://biology-forums.com/index.php?topic=722670>
