

Question 1

Equipment needed for airway management includes _____.

- a. sphygmomanometer
- b. pocket masks
- c. sterile saline
- d. splints

Answer: <https://biology-forums.com/index.php?topic=826137>

Question 2

The EMR is one link in the chain of services that forms the _____.

- a. Health and Welfare (HHS) system
- b. Emergency Medical Services (EMS) system
- c. Community Emergency Outreach (CEO) system
- d. Patient Emergency Care Response (PCR) system

Answer: <https://biology-forums.com/index.php?topic=825055>

Question 3

The acronym "SAMPLE" stands for signs and symptoms, allergies, medications, pertinent past history, _____, and events.

- a. last thing you can remember
- b. latest related injury
- c. least pain or problem
- d. last oral intake

Answer: <https://biology-forums.com/index.php?topic=825671>

Question 4

Your eight-year-old patient has a normal pulse rate, which means it is probably within the _____ range.

- a. 120 to 150
- b. 60 to 80
- c. 80 to 150
- d. 95 to 145

Answer: <https://biology-forums.com/index.php?topic=825687>

Question 5

Judy has swelling, deformity, and pain in her left thigh following a skydive. The preferred method of splinting the thigh is to use a _____ splint.

- a. long backboard
- b. traction
- c. rigid
- d. blanket

Answer: <https://biology-forums.com/index.php?topic=826039>

Question 6

The correct depth for adequate chest compressions in adult CPR is _____ centimetres.

- a. 1.5
- b. 5.0
- c. 2.0
- d. 3.0

Answer: <https://biology-forums.com/index.php?topic=825507>

Question 7

At the beginning of the dilation stage of labour, contractions commonly occur 10 to 20 minutes apart and last about _____ seconds each.

- a. 1 to 2
- b. 5 to 10
- c. 30 to 60
- d. 90 to 150

Answer: <https://biology-forums.com/index.php?topic=826061>

Question 8

The access of choice for entry into a vehicle is the _____.

- a. door
- b. trunk
- c. side window
- d. windshield

Answer: <https://biology-forums.com/index.php?topic=826293>

Question 9

While performing a secondary assessment of your patient's pelvis, you should palpate with _____ force if the bones of the pelvis are close to the skin. Palpate with _____ force if the bones are under a considerable amount of tissue.

- a. less, even less
- b. more, even more
- c. less, more
- d. more, less

Answer: <https://biology-forums.com/index.php?topic=825663>

Question 10
