

Question 1

A computer network consists of at least two computers.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873709>

Question 2

Computer networks that use packet switching are much more efficient than telephone networks that use circuit switching.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873711>

Question 3

Disintermediation provides major benefits to the consumer.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873755>

Question 4

WPA2 is a more effective way to secure a wireless network than WEP because it:

- A) includes an AUP.
- B) operates on a VPN.
- C) uses much longer encryption keys.
- D) uses symmetric encryption methods.
- E) is part of most vendors UTM products.

Answer: <https://biology-forums.com/index.php?topic=1873731>

Question 5

Implementation controls:

- A) can be classified as input controls, processing controls, and output controls.
- B) govern the design, security, and use of computer programs and the security of data files in general throughout the organization.
- C) apply to all computerized applications and consist of a combination of hardware, software, and manual procedures that create an overall control environment.
- D) include software controls, computer operations controls, and implementation controls.
- E) Audit the systems development process at various points to ensure that the process is properly controlled and managed.

Answer: <https://biology-forums.com/index.php?topic=1873730>

Question 6

A service level agreement specifies the nature and level of services provided by service providers.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873675>

Question 7

_____ provides a model for an information system solution and consists of all the specifications that will deliver the functions identified during systems analysis.

- A) A feasibility study
- B) An information requirements analysis
- C) A systems design
- D) An alternative selection process
- E) A testing plan

Answer: <https://biology-forums.com/index.php?topic=1873791>

Question 8

Which of the following is not a typical CASE tool?

- A) Report generators
- B) Analysis tools
- C) Data dictionaries
- D) Code generators
- E) Debugging tools

Answer: <https://biology-forums.com/index.php?topic=1873806>

Question 9

The term cracker is used to identify a hacker with criminal or malicious intent.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873728>

Question 10

The Internet increases information asymmetry.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873754>

Question 11

Uncertainties in the supply chain often lead to:

- A) declines in production.
- B) increases in inventory across all tiers.
- C) strategic changes in production plans.
- D) the bull whip effect.
- E) a reduction in safety stocks.

Answer: <https://biology-forums.com/index.php?topic=1873740>

Question 12

According to the 2017 Identity Fraud Study by Javelin Strategy & Research, how much did consumers lose to identity fraud in 2016?

- A) \$1.6 million
- B) \$16 million
- C) \$160 million
- D) \$1.6 billion
- E) \$16 billion

Answer: <https://biology-forums.com/index.php?topic=1873725>

Question 13

Bandwidth refers to the range of frequencies that can be transmitted by a telecommunications channel.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873715>

Question 14

An MIS generally is not flexible and has little analytical capability.

Answer: <https://biology-forums.com/index.php?topic=1873632>

Question 15

Search engine marketing is the largest form of web marketing.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873766>

Question 16

In public key encryption the keys are mathematically related so that data encrypted with one key can be decrypted using only the other key.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873735>

Question 17

Which of the following systems supports making decisions that are unique, rapidly changing, and not easily specified in advance?

- A) MIS
- B) TPS
- C) ESS
- D) DSS
- E) KWM

Answer: <https://biology-forums.com/index.php?topic=1873626>

Question 18

Each program in a new information system is tested separately in:

- A) application testing.
- B) acceptance testing.
- C) unit testing.
- D) user testing.
- E) system testing.

Answer: <https://biology-forums.com/index.php?topic=1873792>

Question 19

You work for the IT department of a startup and it is your job to set up the testing processes for a new enterprise system the company will be hosting. Describe the processes you will recommend. What unique considerations will you have?

Answer: <https://biology-forums.com/index.php?topic=1873796>

Question 20

In client/server computing, the server provides users access to system resources.

[b][True or False?][b]

Answer: <https://biology-forums.com/index.php?topic=1873671>
