

Question 1

If the QRS complexes are all 15 little blocks apart, the heart rate is _____.

Answer: <https://biology-forums.com/index.php?topic=1915718>

Question 2

Wenckebach is also known as _____.

Answer: <https://biology-forums.com/index.php?topic=1916002>

Question 3

V1's lead is located at the _____.

Answer: <https://biology-forums.com/index.php?topic=1915630>

Question 4

Atrial depolarization is represented on the EKG as a _____.

Answer: <https://biology-forums.com/index.php?topic=1915575>

Question 5

Which of the following are both AV valves?

- Mitral and pulmonic valves
- Aortic and pulmonic valves
- Aortic and mitral valves
- Tricuspid and mitral valves

Answer: <https://biology-forums.com/index.php?topic=1915456>

Question 6

_____ is unwanted jitter or interference on the EKG tracing.

Answer: <https://biology-forums.com/index.php?topic=1915683>

Question 7

The apex of the heart is located at the

- right side of the heart.
- back wall of the heart.
- bottom of the heart, at the leftmost tip.
- top of the heart, where the great vessels emerge.

Answer: <https://biology-forums.com/index.php?topic=1915445>

Question 8

Normal current of the heart travels top to bottom and _____.

Answer: <https://biology-forums.com/index.php?topic=1915638>

Question 9

If both Lead I and aVF's QRS complexes are positive, the axis is _____.

Answer: <https://biology-forums.com/index.php?topic=1916060>

Question 10

The heart's valves open and close in response to changes in

- the heart's pacemaker.
- pressure.
- sodium and potassium concentration.
- oxygenation.

Answer: <https://biology-forums.com/index.php?topic=1915452>

Question 11

Name three causes of PACs. _____.

Answer: <https://biology-forums.com/index.php?topic=1915850>

Question 12

Depolarization is the changing of the cardiac cell to an electrically _____ charge.

Answer: <https://biology-forums.com/index.php?topic=1915576>

Question 13

When oxygenated blood enters the heart, it flows

- from the pulmonary veins into the left atrium.
- from the cardiac veins into the right atrium.
- from the superior vena cava into the right ventricle.
- from the pulmonary artery into the left ventricle.

Answer: <https://biology-forums.com/index.php?topic=1915464>

Question 14

Which heart chamber delivers oxygenated blood to the entire body?

- Right atrium
- Left ventricle
- Right ventricle
- Left atrium

Answer: <https://biology-forums.com/index.php?topic=1915451>

Question 15

In which two chambers of the heart does blood have an oxygen concentration of nearly 100%?

- Left atrium and right ventricle
- Left atrium and left ventricle
- Right atrium and right ventricle
- Right atrium and left ventricle

Answer: <https://biology-forums.com/index.php?topic=1915472>

Question 16

The origin of the P waves in AV blocks is the _____.

Answer: <https://biology-forums.com/index.php?topic=1915995>

Question 17

Heart rate is the same as _____ rate.

Answer: <https://biology-forums.com/index.php?topic=1915717>

Question 18

The _____ is the layer of the heart that contains the cardiac conduction system.

Answer: <https://biology-forums.com/index.php?topic=1915500>

Question 19

Atropine should be given for junctional bradycardia if the patient is _____.

Answer: <https://biology-forums.com/index.php?topic=1915894>

Question 20

Multifocal atrial tachycardia is the same rhythm as _____, but with a faster heart rate.

Answer: <https://biology-forums.com/index.php?topic=1915847>

Question 21

Name the implantable device that delivers a small internal shock to treat arrhythmias such as V-tach. _____.

Answer: <https://biology-forums.com/index.php?topic=1916238>

Question 22

The two phases of the cardiac cycle are systole and _____.

Answer: <https://biology-forums.com/index.php?topic=1915507>

Question 23

The epicardium is the layer of the heart that is damaged during a heart attack.

- true
- false

Answer: <https://biology-forums.com/index.php?topic=1915481>

Question 24

Lead aVR's positive electrode is located on the _____.

Answer: <https://biology-forums.com/index.php?topic=1915636>

Question 25

An impulse traveling at a right angle to the positive electrode writes _____ on the EKG paper.

Answer: <https://biology-forums.com/index.php?topic=1915635>

Question 26

In first-degree AV block, _____ sinus impulses get through to the ventricles.

Answer: <https://biology-forums.com/index.php?topic=1916001>

Question 27

The _____ is the chamber that receives blood from the superior and inferior venae cavae.

Answer: <https://biology-forums.com/index.php?topic=1915502>

Question 28

Ventricular bigeminy is a term that means the PVCs occur every _____ beat.

Answer: <https://biology-forums.com/index.php?topic=1915951>

Question 29

Verapamil is a Class _____ antiarrhythmic medication.

Answer: <https://biology-forums.com/index.php?topic=1916236>

Question 30

Which of the following statements about the right atrium is TRUE?

- It is about 100% saturated with oxygen.
- It is a receiving chamber for oxygenated blood returning from the lungs.
- It is the receiving chamber for deoxygenated blood coming from the vena cava.
- It is the major pumping chamber of the heart.

Answer: <https://biology-forums.com/index.php?topic=1915450>

Question 31

The coronary artery that feeds blood to the right ventricle and the inferior wall of the left ventricle is the _____.

Answer: <https://biology-forums.com/index.php?topic=1915505>

Question 32

A P wave that is upside down is called _____.

Answer: <https://biology-forums.com/index.php?topic=1915897>

Question 33

The vessel that delivers oxygenated blood to the capillary bed is the

- venule.
- artery.
- arteriole.
- vein.

Answer: <https://biology-forums.com/index.php?topic=1915480>

Question 34

A _____ MI is seen as a mirror image of an anterior MI.

Answer: <https://biology-forums.com/index.php?topic=1916132>

Question 35

Einthoven's law states that _____.

Answer: <https://biology-forums.com/index.php?topic=1915629>

Question 36

The word "somatic" means _____.

Answer: <https://biology-forums.com/index.php?topic=1915689>

Question 37

The superior vena cava returns blood to the right atrium from the _____.

Answer: <https://biology-forums.com/index.php?topic=1915504>

Question 38

A rate-related BBB is one which _____.

Answer: <https://biology-forums.com/index.php?topic=1916058>

Question 39

RVH stands for _____.

Answer: <https://biology-forums.com/index.php?topic=1916056>

Question 40

Arrhythmias are _____ heart rhythms.

Answer: <https://biology-forums.com/index.php?topic=1915584>

Question 41

Transmembrane potential is the electrical charge at the _____.

Answer: <https://biology-forums.com/index.php?topic=1915577>

Question 42

Conduction to the ventricle is said to be _____ in junctional rhythms.

Answer: <https://biology-forums.com/index.php?topic=1915893>

Question 43

Together, the sympathetic nervous system and the parasympathetic nervous system make up the

- central nervous system.
- peripheral nervous system.
- automatic nervous system.
- autonomic nervous system.

Answer: <https://biology-forums.com/index.php?topic=1915475>

Question 44

A thick-looking pattern on the EKG paper that looks like someone used a thick Magic Marker to write the baseline is typical of what kind of artifact?

Answer: <https://biology-forums.com/index.php?topic=1915687>

Question 45

The Ds in DDD pacemaker stand for _____.

Answer: <https://biology-forums.com/index.php?topic=1916249>

Question 46

The cardiac research pioneer whose work resulted in the law stating that Lead I + Lead III = Lead II is _____.

Answer: <https://biology-forums.com/index.php?topic=1915626>

Question 47

_____ is potassium deficit in the bloodstream.

Answer: <https://biology-forums.com/index.php?topic=1916051>

Question 48

Early repolarization often has a unique EKG finding that makes recognition easier. What is that finding?

Answer: <https://biology-forums.com/index.php?topic=1916134>

Question 49

Name three causes of junctional tachycardia.

Answer: <https://biology-forums.com/index.php?topic=1915900>

Question 50

V5's QRS complex should be primarily _____.

Answer: <https://biology-forums.com/index.php?topic=1915639>

Question 51

The top of the heart where the great vessels emerge is the

- chordae tendinae.
- base.
- apex.
- tricuspid valve.

Answer: <https://biology-forums.com/index.php?topic=1915443>

Question 52

The structure that prevents backflow of blood is the

- trabeculae carneae.
- valve.
- papillary muscle.
- superior vena cava.

Answer: <https://biology-forums.com/index.php?topic=1915459>

Question 53

Normal conduction begins with the pacemaker of the heart, the _____.

Answer: <https://biology-forums.com/index.php?topic=1915582>

Question 54

A run of three or more PACs in a row that usurps the underlying rhythm is called _____.

Answer: <https://biology-forums.com/index.php?topic=1915841>

Question 55

Lead aVF's positive electrode is located on the _____.

Answer: <https://biology-forums.com/index.php?topic=1915637>

Question 56

The fluid found between the layers of the pericardium is called _____.

Answer: <https://biology-forums.com/index.php?topic=1915501>

Question 57

The treatment of choice for ventricular fibrillation is _____.

Answer: <https://biology-forums.com/index.php?topic=1915945>

Question 58

Lead III measures the current traveling between the _____.

Answer: <https://biology-forums.com/index.php?topic=1915628>

Question 59

Which is TRUE about the rest-and-digest response?

- It results in increased heart rate and blood pressure.
- It slows down digestion.

- It is a function of the sympathetic nervous system.
- It decreases heart rate and blood pressure.

Answer: <https://biology-forums.com/index.php?topic=1915465>

Question 60

PJCs are _____ beats from the AV junction.

Answer: <https://biology-forums.com/index.php?topic=1915892>

Question 61

In a sinus arrest, the sinus node _____ firing for a time.

Answer: <https://biology-forums.com/index.php?topic=1915800>

Question 62

The second letter of the pacemaker code refers to the _____.

Answer: <https://biology-forums.com/index.php?topic=1916241>

Question 63

The coronary artery that feeds blood to the lateral wall of the left ventricle is the _____.

Answer: <https://biology-forums.com/index.php?topic=1915506>

Question 64

The distance between consecutive P waves is called the _____.

Answer: <https://biology-forums.com/index.php?topic=1915737>

Question 65

What are the five steps in rhythm interpretation?

Answer: <https://biology-forums.com/index.php?topic=1915740>

Question 66

The innermost layer of the heart is the

- pericardium.
- epicardium.
- myocardium.
- endocardium.

Answer: <https://biology-forums.com/index.php?topic=1915447>

Question 67

Critical rate is the rate at which _____.

Answer: <https://biology-forums.com/index.php?topic=1916057>

Question 68

The _____ is the structure obtained from joining leads I, II, and III at the middle.

Answer: <https://biology-forums.com/index.php?topic=1915632>

Question 69

In order to diagnose PAT, the _____ that initiates it must be seen.

Answer: <https://biology-forums.com/index.php?topic=1915849>

Question 70

Class I antiarrhythmics are called _____ channel blockers.

Answer: <https://biology-forums.com/index.php?topic=1916235>

Question 71

The vessel that delivers oxygenated blood to the anterior wall of the left ventricle is the

- coronary vein.
- right coronary artery.
- left anterior descending coronary artery.

• left main coronary artery.

Answer: <https://biology-forums.com/index.php?topic=1915467>

Question 72

An AOO pacemaker would pace and sense which (if any) chambers of the heart?

Answer: <https://biology-forums.com/index.php?topic=1916246>

Question 73

Based on Einthoven's Law, the shortest QRS complex should NOT be in Lead _____.

Answer: <https://biology-forums.com/index.php?topic=1915633>

Question 74

An age-indeterminate MI is called a _____ by some authorities.

Answer: <https://biology-forums.com/index.php?topic=1916131>

Question 75

The primary treatment of sinus tachycardia in a patient with a temperature of 103 degrees would be to _____.

Answer: <https://biology-forums.com/index.php?topic=1915794>

Question 76

P waves hidden inside the QRS are a hallmark of junctional rhythms originating _____ in the AV junction.

Answer: <https://biology-forums.com/index.php?topic=1915898>

Question 77

The letters in AICD stand for _____.

Answer: <https://biology-forums.com/index.php?topic=1916239>

Question 78

Pericardial fluid

- prevents backflow of blood from one chamber to the other.
- lubricates the electrical system of the heart.
- decreases friction of the pericardial layers as they rub against each other.
- circulates through the heart's chambers.

Answer: <https://biology-forums.com/index.php?topic=1915446>

Question 79

The cardiac cycle's two phases are

- atrial kick and ventricular filling.
- preload and afterload.
- systole and diastole.
- isovolumetric relaxation and contraction.

Answer: <https://biology-forums.com/index.php?topic=1915469>

Question 80

Why does atropine not work when the block is at the bundle branches?

Answer: <https://biology-forums.com/index.php?topic=1915996>

Question 81

Electrically speaking, the EKG machine is a _____ and the heart is a transmitter.

Answer: <https://biology-forums.com/index.php?topic=1915693>

Question 82

In the precordial leads, we look at current flow in the _____ plane.

Answer: <https://biology-forums.com/index.php?topic=1915625>

Question 83

Pulmonary veins deliver blood to the

- left ventricle.
- right atrium.
- right ventricle.
- left atrium.

Answer: <https://biology-forums.com/index.php?topic=1915466>

Question 84

Name three ventricular rhythms that can be treated by electrical shock to the heart.

Answer: <https://biology-forums.com/index.php?topic=1915953>

Question 85

A _____ is an arrow that depicts the general direction of current flow.

Answer: <https://biology-forums.com/index.php?topic=1915631>

Question 86

In sinus rhythms, P waves are found _____ the QRS complexes.

Answer: <https://biology-forums.com/index.php?topic=1915796>

Question 87

The electrical signals that tell the heart when to beat are created and transmitted by

- contractile cells.
- coronary system cells.
- circumflex cells.
- conduction system cells.

Answer: <https://biology-forums.com/index.php?topic=1915474>

Question 88

The three methods of calculating heart rate are six-second strip, memory method, and _____.

Answer: <https://biology-forums.com/index.php?topic=1915716>

Question 89

Junctional tachycardia is best called SVT if there are no _____ P waves.

Answer: <https://biology-forums.com/index.php?topic=1915899>

Question 90

What kind of symptoms does first-degree AV block cause?

Answer: <https://biology-forums.com/index.php?topic=1915998>

Question 91

Stimulation of the vagus nerve

- causes the release of norepinephrine and triggers the rest-and-digest response.
- causes the release of norepinephrine and triggers the fight-or-flight response.
- causes the release of acetylcholine and triggers the fight-or-flight response.
- causes the release of acetylcholine and triggers the rest-and-digest response.

Answer: <https://biology-forums.com/index.php?topic=1915477>

Question 92

CPR artifact is caused by chest compressions obscuring the real _____.

Answer: <https://biology-forums.com/index.php?topic=1915692>

Question 93

The coronary circulation supplies oxygenated blood to the myocardium during

- the entire cardiac cycle.
- isovolumetric contraction.
- ventricular ejection.
- diastole.

Answer: <https://biology-forums.com/index.php?topic=1915468>

Question 94

The first heart sound (S1) is associated with closure of which heart valves?

- Mitral and aortic
- Tricuspid and mitral
- Aortic and pulmonic
- Tricuspid and pulmonic

Answer: <https://biology-forums.com/index.php?topic=1915457>

Question 95

Mobitz II second-degree AV block involves a block at either the AV node or the _____.

Answer: <https://biology-forums.com/index.php?topic=1916003>

Question 96

The third letter of the pacemaker code refers to the _____.

Answer: <https://biology-forums.com/index.php?topic=1916242>

Question 97

A condition in which the thyroid gland overproduces thyroid hormones and causes the heart rate, temperature, and blood pressure to rise to dangerous levels is called _____.

Answer: <https://biology-forums.com/index.php?topic=1915795>

Question 98

The parasympathetic nervous system causes

- pupillary dilation.
- increase in blood pressure.
- slowed digestion.
- decrease in heart rate.

Answer: <https://biology-forums.com/index.php?topic=1915471>

Question 99

The semilunar valves open when the

- atrial pressure exceeds the ventricular pressure.
- ventricular pressure exceeds the aortic and pulmonary arterial pressures.
- impulse arrives at the AV node.
- atrial and ventricular pressures are equal.

Answer: <https://biology-forums.com/index.php?topic=1915470>

Question 100

The second heart sound (S2) is associated with closure of which heart valves?

- Tricuspid and pulmonic
- Aortic and pulmonic
- Tricuspid and mitral
- Mitral and aortic

Answer: <https://biology-forums.com/index.php?topic=1915458>

Question 101

A regular rhythm is one in which _____.

Answer: <https://biology-forums.com/index.php?topic=1915720>

Question 102

_____ is the only normal heart rhythm.

Answer: <https://biology-forums.com/index.php?topic=1915791>

Question 103

The EKG machine's control feature that might reduce artifact is the _____.

Answer: <https://biology-forums.com/index.php?topic=1915684>

Question 104

QRS complexes in ventricular rhythms should be _____ seconds wide.

Answer: <https://biology-forums.com/index.php?topic=1915952>

Question 105

Through which structure must blood travel in order to leave the right ventricle?

- Pulmonic valve
- Right atrium
- Left ventricle
- Tricuspid valve

Answer: <https://biology-forums.com/index.php?topic=1915461>

Question 106

In a second-degree AV block, some impulses from the sinus node _____ to the ventricles; others don't.

Answer: <https://biology-forums.com/index.php?topic=1916000>

Question 107

Treatment for V-fib is to immediately _____.

Answer: <https://biology-forums.com/index.php?topic=1916231>

Question 108

Which of the following is the correct sequence of blood flow through the peripheral circulation?

- Arteries—arterioles—capillaries—venules—veins
- Capillaries—arterioles and venules—arteries and veins
- Arteries—veins—vena cava—capillaries
- Veins—venules—capillaries—arterioles—arteries

Answer: <https://biology-forums.com/index.php?topic=1915479>

Question 109

In AV blocks, the underlying rhythm is _____.

Answer: <https://biology-forums.com/index.php?topic=1915999>

Question 110

Through which vessel does oxygenated blood enter the capillaries?

- Veins
- Aorta
- Venules
- Arterioles

Answer: <https://biology-forums.com/index.php?topic=1915478>

Question 111

The fight-or-flight response is

- associated with the parasympathetic nervous system and mediated by acetylcholine.
- associated with the sympathetic nervous system and mediated by acetylcholine.
- associated with the sympathetic nervous system and mediated by norepinephrine.
- associated with the parasympathetic nervous system and mediated by norepinephrine.

Answer: <https://biology-forums.com/index.php?topic=1915476>

Question 112

If artifact is seen in leads I, III, and aVL, you should direct your corrective efforts to which limb or limbs?

Answer: <https://biology-forums.com/index.php?topic=1915690>

Question 113

The function of the heart is to _____.

Answer: <https://biology-forums.com/index.php?topic=1915508>

Question 114

When a pacemaker fires, it causes a _____ on the EKG.

Answer: <https://biology-forums.com/index.php?topic=1916243>

Question 115

The PR interval in sinus rhythms should be _____ from beat to beat.

Answer: <https://biology-forums.com/index.php?topic=1915798>

Question 116

What causes heart sounds?

- Blood hitting an obstruction in the peripheral circulation
- Opening of the heart valves
- Closing of the heart valves
- Blood traveling through the heart

Answer: <https://biology-forums.com/index.php?topic=1915460>

Question 117

Broken recording is caused by _____.

Answer: <https://biology-forums.com/index.php?topic=1915691>

Question 118

Normal QRS interval is _____ seconds or less than three small blocks.

Answer: <https://biology-forums.com/index.php?topic=1915580>

Question 119

Pericarditis is _____ of the pericardium.

Answer: <https://biology-forums.com/index.php?topic=1916127>

Question 120

AED stands for _____.

Answer: <https://biology-forums.com/index.php?topic=1916230>

Question 121

A pacing catheter is the _____ inserted into the chamber.

Answer: <https://biology-forums.com/index.php?topic=1916248>

Question 122

The first letter of the pacemaker code refers to the _____.

Answer: <https://biology-forums.com/index.php?topic=1916240>

Question 123

If the QRS complexes are all 50 little blocks apart, the heart rate is _____.

Answer: <https://biology-forums.com/index.php?topic=1915719>

Question 124

DDD pacemakers pace and sense which chamber(s) of the heart? _____.

Answer: <https://biology-forums.com/index.php?topic=1916245>

Question 125

Lidocaine is used to treat _____ arrhythmias.

Answer: <https://biology-forums.com/index.php?topic=1916237>

Question 126

Which medication used to treat SVT can cause several seconds of asystole before the rhythm converts? _____.

Answer: <https://biology-forums.com/index.php?topic=1916233>

Question 127

The cardiac cycle refers to the mechanical events that occur to _____.

Answer: <https://biology-forums.com/index.php?topic=1915499>

Question 128

The distance between consecutive pacemaker spikes is referred to as the _____.

Answer: <https://biology-forums.com/index.php?topic=1916244>

Question 129

Which type of cardiac cells cause the heart muscle to contract?

- Circumflex cells
- Contractile cells
- Coronary system cells
- Conduction system cells

Answer: <https://biology-forums.com/index.php?topic=1915473>

Question 130

The valve that separates the right atrium and right ventricle is the

- mitral valve.
- aortic valve.
- pulmonic valve.
- tricuspid valve.

Answer: <https://biology-forums.com/index.php?topic=1915454>

Question 131

Two consecutive PVCs are called a _____.

Answer: <https://biology-forums.com/index.php?topic=1915950>

Question 132

The leads one looks at to find an inferior MI are _____.

Answer: <https://biology-forums.com/index.php?topic=1916133>

Question 133

Anterior MI has indicative changes in leads _____.

Answer: <https://biology-forums.com/index.php?topic=1916129>

Question 134

A pulse generator is a _____ pack.

Answer: <https://biology-forums.com/index.php?topic=1916247>

Question 135

Baseline sway is caused by lotion or sweat on the skin interfering with the _____ reaching the EKG machine.

Answer: <https://biology-forums.com/index.php?topic=1915688>

Question 136

The normal heart is the size of a

- watermelon.
- foot.
- man's fist.
- cherry.

Answer: <https://biology-forums.com/index.php?topic=1915442>

Question 137

The layer of the heart that is damaged during a heart attack is the

- epicardium.
- myocardium.
- endocardium.
- pericardium.

Answer: <https://biology-forums.com/index.php?topic=1915448>

Question 138

Troubleshooting involves determining and alleviating the cause of _____.

Answer: <https://biology-forums.com/index.php?topic=1915686>

Question 139

A lead is an electrocardiographic _____.

Answer: <https://biology-forums.com/index.php?topic=1915627>

Question 140

The pacemaker with the slowest inherent rate is the _____.

Answer: <https://biology-forums.com/index.php?topic=1915583>

Question 141

Torsades de pointes is a form of ventricular tachycardia that _____ around an axis.

Answer: <https://biology-forums.com/index.php?topic=1915947>

Question 142

In sinus rhythms, the QRS complexes should have an interval of _____.

Answer: <https://biology-forums.com/index.php?topic=1915797>

Question 143

A rhythm with a heart rate less than 60 is _____.

Answer: <https://biology-forums.com/index.php?topic=1915793>

Question 144

The heart valve found at the opening of the pulmonary artery is the

- tricuspid valve.
- pulmonic valve.
- aortic valve.
- mitral valve.

Answer: <https://biology-forums.com/index.php?topic=1915455>

Question 145

The normal rhythm of the heart is called _____.

Answer: <https://biology-forums.com/index.php?topic=1915739>

Question 146

How do the P waves of junctional rhythms differ from the P waves of sinus rhythms?

Answer: <https://biology-forums.com/index.php?topic=1915901>

Question 147

The difference between unipolar and bipolar leads is that _____ involves two limbs.

Answer: <https://biology-forums.com/index.php?topic=1915634>

Question 148

Agonal rhythm has a heart rate less than _____.

Answer: <https://biology-forums.com/index.php?topic=1915949>

Question 149

Which of these statements about the pericardium is NOT true?

- It anchors the heart to the diaphragm and great vessels.
- It serves as protection for the heart.
- It is the wall of the heart that is damaged in a heart attack.
- It is a two-layer sac enclosing the heart.

Answer: <https://biology-forums.com/index.php?topic=1915449>

Question 150

The fibrous tissue that divides the heart into right and left sides is the

- chordae tendonae.
- papillary muscle.
- pulmonic valve.
- septum.

Answer: <https://biology-forums.com/index.php?topic=1915444>

Question 151

The tricuspid valve separates the _____ from the _____.

Answer: <https://biology-forums.com/index.php?topic=1915498>

Question 152

The most common cause of an unexplained pause is a _____.

Answer: <https://biology-forums.com/index.php?topic=1915842>

Question 153

A negative deflection that occurs before a positive one is labeled a _____ wave.

Answer: <https://biology-forums.com/index.php?topic=1915581>

Question 154

One small block on the EKG paper measures _____ seconds.

Answer: <https://biology-forums.com/index.php?topic=1915579>

Question 155

Left ventricular hypertrophy is determined by adding _____.

Answer: <https://biology-forums.com/index.php?topic=1916055>

Question 156

Junctional tachycardia with a heart rate of 130 can result in _____ cardiac output.

Answer: <https://biology-forums.com/index.php?topic=1915895>

Question 157

Refractory means _____ to.

Answer: <https://biology-forums.com/index.php?topic=1915578>

Question 158

The normal amount of blood circulated by the heart every minute is _____ liters.

Answer: <https://biology-forums.com/index.php?topic=1915509>

Question 159

Thrombolytics are medications that can be used to _____.

Answer: <https://biology-forums.com/index.php?topic=1916232>

Question 160

What must be done to a monitor-defibrillator to change it from cardioversion mode to defibrillator mode? _____.

Answer: <https://biology-forums.com/index.php?topic=1916234>

Question 161

The EKG machine control feature that controls the size of the waves and complexes is the _____.

Answer: <https://biology-forums.com/index.php?topic=1915685>

Question 162

An arrhythmia is a(n) _____ heart rhythm.

Answer: <https://biology-forums.com/index.php?topic=1915736>

Question 163

_____ is a rhythm with a heart rate greater than 100.

Answer: <https://biology-forums.com/index.php?topic=1915792>

Question 164

PVC stands for _____.

Answer: <https://biology-forums.com/index.php?topic=1915944>

Question 165

If Lead I and aVF both have negative QRS complexes, the axis is _____.

Answer: <https://biology-forums.com/index.php?topic=1916059>

Question 166

Paroxysmal atrial tachycardia is an atrial tachycardia that _____ the underlying rhythm.

Answer: <https://biology-forums.com/index.php?topic=1915848>

Question 167

Name the three Is of infarction.

Answer: <https://biology-forums.com/index.php?topic=1916135>

Question 168

Which valves open to allow the ventricles to fill?

- Aortic and mitral
- Tricuspid and mitral
- Tricuspid and pulmonic
- Aortic and pulmonic

Answer: <https://biology-forums.com/index.php?topic=1915462>

Question 169

An axis of +120 degrees is _____ deviation.

Answer: <https://biology-forums.com/index.php?topic=1916052>

Question 170

The AV block characterized by gradually prolonging PR intervals until a QRS is blocked is _____.

Answer: <https://biology-forums.com/index.php?topic=1915997>

Question 171

Heart valves serve what purpose?

- They prevent backflow of blood.
- They control the heart's electrical signals.
- They prevent blood from flowing forward.
- They prevent oxygenated blood from flowing through the coronary arteries.

Answer: <https://biology-forums.com/index.php?topic=1915453>

Question 172

The normal PR interval in sinus rhythm should be _____.

Answer: <https://biology-forums.com/index.php?topic=1915738>

Question 173

Reciprocal ST depression is seen only when there is _____ in the indicative leads.

Answer: <https://biology-forums.com/index.php?topic=1916128>

Question 174

The P wave of a PAC is shaped _____ from sinus P waves.

Answer: <https://biology-forums.com/index.php?topic=1915845>

Question 175

The inferior vena cava returns deoxygenated blood to the heart from

- the lower extremities and abdomen.
- the head and neck.
- the coronary circulation.
- none of these—the vena cava carries oxygenated blood.

Answer: <https://biology-forums.com/index.php?topic=1915463>

Question 176

Explain where the leads are placed for a right-sided EKG.

Answer: <https://biology-forums.com/index.php?topic=1916136>

Question 177

AV blocks involve a block in conduction between _____.

Answer: <https://biology-forums.com/index.php?topic=1915994>
