Answer: <https://biology-forums.com/index.php?topic=1922484>

Question 4

The patient is a 32-year-old female who has noted tenderness in the neck area along with some swelling. On examination, she was found to have enlarged cervical lymph nodes. It was recommended that she have a biopsy done. She was, therefore, admitted today to undergo needle biopsy of the cervical lymph nodes. The needle biopsy was performed without complications and the aspirate was sent for pathological examination. She will be released to home and will see me in two days for discussion of the biopsy results.

Codes(s): _____

Answer: <https://biology-forums.com/index.php?topic=1922795>
