Answer: <https://biology-forums.com/index.php?topic=361049>

Question 8

Which of the following BEST describes a disease such as deafness?

- A) Acquired disease
- B) Congenital disease
- C) Either a congenital or acquired disease
- D) Neither a congenital nor acquired disease

Answer: <https://biology-forums.com/index.php?topic=360835>

Question 9

While developing a diagnosis, when should the EMT treat the life threats found in the primary assessment?

- A) After the EMS diagnosis
- B) After the differential diagnosis
- C) When a threat is found
- D) At the end of the primary assessment

Answer: <https://biology-forums.com/index.php?topic=361910>

Question 10

Which of the following choices is NOT a justifiable reason for delaying transport of a critical trauma patient?

- A) Immobilizing the patient to a long spine board
- B) Suctioning the airway
- C) Awaiting arrival of the patient's parents on-scene
- D) Ventilating a patient in respiratory distress

Answer: <https://biology-forums.com/index.php?topic=360585>

Question 11

A family member who keeps pleading with a deceased loved one to "wake up" is experiencing which reaction to death and dying?

- A) Projection
- B) Denial
- C) Rejection
- D) Anger

Answer: <https://biology-forums.com/index.php?topic=361284>

Question 12

When transporting a patient who is morbidly obese to the hospital, it is important to monitor which of the following vital signs?

- A) Pulse rate
- B) Blood pressure
- C) Oxygen saturation
- D) Blood glucose level

Answer: <https://biology-forums.com/index.php?topic=360822>

Question 13

Which of the following conditions does NOT require intervention in the "Breathing" phase of the primary assessment?

- A) Respiratory rate of 28 with adequate depth
- B) Respiratory rate of 6 with adequate depth
- C) Respiratory rate of 12 with adequate depth
- D) There is not enough information to answer this question.

Answer: <https://biology-forums.com/index.php?topic=361663>

Question 14

Artificial ventilations for a 5-year-old child should be provided at a rate of _____ per minute.

- A) 12/20
- B) 24/28
- C) 22/26
- D) 28/32

Answer: <https://biology-forums.com/index.php?topic=360769>

Question 15

Which of the following is true regarding the EMT's approach to the pediatric patient?

- A) Scene safety is not an important consideration in the care of pediatric patients.
- B) It is not necessary to use Standard Precautions when dealing with pediatric patients.
- C) An EMT does not have to attempt to obtain a blood pressure on patients younger than 3 years old.
- D) It is not possible to develop an initial impression of the pediatric patient without a detailed physical examination.

Answer: <https://biology-forums.com/index.php?topic=360763>

Question 16

Which of the following is NOT an objective element of documented patient information?

- A) Patient's blood pressure
- B) Position in which the patient was found
- C) Patient's complaint of nausea
- D) Patient's age

Answer: <https://biology-forums.com/index.php?topic=361972>

Question 17

The most frequently transplanted organ is the:

- A) liver.
- B) kidney.
- C) heart.
- D) pancreas.

Answer: <https://biology-forums.com/index.php?topic=360246>

Question 18
